CMS National Coverage Policy

Title XVIII of the Social Security Act, Section 1862(a)(1)(A) states that no Medicare payment shall be made for items or services which are not reasonable and necessary for the diagnosis or treatment of illness or injury.

Title XVIII of the Social Security Act, Section 1862(a)(7). This section excludes routine physical examinations.

Title XVIII of the Social Security Act, Section 1833(e) states that no payment shall be made to any provider for any claim that lacks the necessary information to process the claim.

42CFR410.32(a) requires a clinical diagnostic test be ordered by the physician who is treating the patient for a specific medical problem and uses the results in the management of the beneficiary's specific problem.

MBPM Internet Only Manual (IOM 100-02), Chapter 6, Section 20.4.3 applies 42CFR410.32 to hospitals.

Article Guidance

Article Text

This article contains coding or other guidelines that complement the local coverage determination (LCD) for Vitamin D Assay Testing.

Coding Information:

Procedure codes may be subject to National Correct Coding Initiative (NCCI) edits or OPPS packaging edits. Refer to NCCI and OPPS requirements prior to billing Medicare.

For services requiring a referring/ordering physician, the name and NPI of the referring/ordering physician must be reported on the claim.

A claim submitted without a valid ICD-10-CM diagnosis code will be returned to the provider as an incomplete claim under Section 1833(e) of the Social Security Act.

The diagnosis code(s) must best describe the patient's condition for which the service was performed.

Documentation

- Documentation must justify the test(s) chosen for a particular disease entity. Various component sources of 25-OH Vitamin D, such as stored D or diet-derived D, should not be billed separately.
- If Vitamin D level is between 20 and 50 ng/ml and patient is clinically stable, documentation in the patient's medical record for repeat testing must clearly indicate the necessity of the test.
